

Biology of Insects

ENTO 3013 Introduction to Entomology

New Course Format—Lecture only

Optional Lab - read below

Fall Semester 2011

3 Credit Hours

Lectures: Tues & Thurs 11:00-12:20

Instructor: Dr. Ashley Dowling

Email: adowling@uark.edu

Phone: 575-2482

Come learn about the fascinating world of insects. This course provides a broad overview of insect biology, covering topics such as morphology and physiology, ecology, biodiversity, sociality, life history strategies such as parasitism, herbivory and predation, and much more. **The course is now lecture only.** For students interested in learning insect identification in an intensive lab format, ENTO 3011 is now being offered for 1 credit Wed 1:30-4:20 (see other flyer). Any students wishing to take Insect Taxonomy (ENTO 4024) in the future must first take ENTO 3013 and 3011. Courses offered each Fall. Register now or contact Dr. Dowling for more information.
