

Identification of Insects

ENTO 3011 Introduction to Insect ID

New Lab Course

Fall Semester 2011

1 Credit Hour

Wednesday 1:30-4:20

AGRI 315B

Instructor: Dr. Ashley Dowling

Email: adowling@uark.edu

Phone: 575-2482

Learn to identify all the insect orders and many common families and species. Explore insect diversity and learn to collect insects and prepare a professional insect collection. This is an intensive lab course designed for serious students. The lab course will include mandatory field trips during the class period and optional weekend trips designed to expose students to different habitats, collecting methods, and insect diversity. Any students wishing to take Insect Taxonomy (ENTO 4024) in the future must first take ENTO 3011. Students must be currently enrolled in or have previously taken and passed ENTO 3013 in order to take ENTO 3011. Register now or contact Dr. Dowling for more information.
